A message to all associates

Human Resources

Team Cognizant:

One of the most exciting new prospects in our industry is Generative AI (GenAI). This transformative technology has generated a lot of enthusiasm across our industry and among our clients and associates.

To continue this momentum, I encourage you to keep learning and growing your GenAI skills. Whether you are a beginner or an expert, you will find something that suits your needs and interests. Our [Generative AI Fundamentals course](#) is open to all associates, with no pre-requisites.

You can find a curated training repository and resources including live programs and on-demand sessions on the [GenAI Hub](#) – your platform for everything you need access to and about Generative AI.

GenAI is not only a technology, but also a mindset – one about imagining new possibilities, experimenting with new ideas, and collaborating with others. I hope you will join me in embracing this opportunity and making the most of it.

I also want to take the opportunity to applaud everyone who has shared their innovative spirit through [Bluebolt](#) and those who generate game-changing modernizations for our clients through our Cognizant Neuro[®] AI platform. We should take great pride in seeing innovation and excellence throughout our organization.

Thank you for your hard work and dedication to lifelong learning.

Kathy Diaz
Chief People Officer
