

GitHub CoPilot Trial

From FITChangeMGMT(Cognizant) <FITChangeMGMT@cognizant.com>

Date Mon 9/25/2023 8:19 PM

To GithubCopilotuser (Cognizant) <GithubCopilotuser@cognizant.com>

Dear Associate,

As you are using, one of the GitHub CoPilot supported IDEs, we invite you to participate in a 30 day GitHub CoPilot trial.

What is GitHub CoPilot?

[GitHub Copilot](#) is an AI-powered coding assistant that helps you write better code, faster.

Who is eligible?

Associates using Cognizant-provided assets or Cognizant-provided OS images are eligible for this. Since GitHub CoPilot can be authenticated only using Cognizant's login ID and not using client-provided login IDs,

How to participate in this trial?

To participate in the trial, please respond to the question in [this link](#) on or before 29th September

What are the Prerequisites?

- Visual Studio 2022 17.5.5 or newer. If you don't have Visual Studio 2022 17.5.5 or newer, please raise a ServiceNow request and get it installed.
- For other IDEs, please refer [GitHub Copilot link](#) for compatible versions/IDEs.
- We are working with Corporate Security team to obtain the necessary approvals for this trial phase.

What are the next steps?

- Post 29th September, we will schedule a call with the Microsoft team to demo and initiate training on GitHub Copilot.
- Start of the 30-day trial period will be communicated after this training completes.
- We will conduct surveys at regular intervals to get your feedback.

Thanks,

GitHub CoPilot Trial Team

P.S.

- You can participate in this trial even if you were part of the earlier pilot.
- GitHub CoPilot Supported IDEs: Visual Studio Code, Visual Studio, Vim, Neovim, the JetBrains suite of IDEs, and Azure Data Studio.
- **Please ignore this email, if you're already registered using [this link](#).**

This is an unattended mail box; please do not respond to this.
