

SET Notification for you: Security Endorsement Tool (SET) from Corporate Security is Open for the month of October, 2023.

From One Communicator (Cognizant) <1CommEmailPRD@cognizant.com>

Date Mon 10/30/2023 1:20 AM

To Uddin, Md. Kamran (Cognizant) <Md.Kamran.Uddin@cognizant.com>

Dear Associate ,

The Security Endorsement Tool (SET) is open to you for the month of October 2023. Please ensure that you complete the assessment on or before 17-Nov-2023 11:59 PM IST.

The objective of this tool is to improve the awareness level of associates around Cognizant and Client Information Security and Acceptable Use policies.

Please [click here](#) to read the guidelines and complete the assessment.

Due to assessment completion related technical issues observed in the month of May and initial half of June 2023, we are requesting your support to complete the Q2 assessment activity on an expedited schedule in late June and early July 2023. Your patience, understanding and focus during this activity is extremely appreciated.

Note:

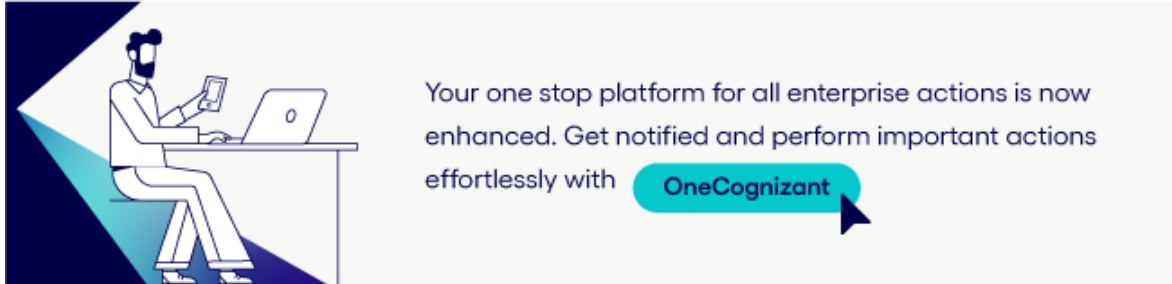

- The SET assessment is mandatory for all associates who have received this email invite.
- The SET application is compatible with Chrome, Firefox and Edge browsers.
- The assessment is restricted to a single attempt during an assessment cycle, irrespective of the (pass or fail) result.
- If the assessment gets suspended before submission, it will not be available for the day and will be reset automatically at 12.00 AM IST, the next day.

A few associates may face access issues / Microsoft login error / blank screen while accessing the SET application. Note that this is not a SET application specific issue and occurs when individual MFA setup is not configured correctly. Please raise a [service ticket](#) or call the Global Service Desk to get help.

For any other technical issues, please make use of the "Live Chat Support" option in SET application or raise a [service ticket](#).

Regards,
Corporate Security Team
