Hi Team,

Most of you might have received furlough mail for Sep 1st, 4th and 5th.
If you are not taking leave, then you can spend time completing your RDP plan and learning and most importantly identify some continuous improvement opportunities and log the ideas in iSpace.
Please utilize your time appropriately and this is the good opportunity to do so!

Thanks and Regards,
Rohit Dharmik

Subject: Bluebolt and Idea Generation

Dear All,

As you know, many of our Pershing associates will not be working on Sep 1st, 4th and 5th. Some of them may take leave; but many may not. We have to encourage them to take up couple of things during this time. They can spend time on RDP and learnings. Second and more important is to look at this as an opportunity to think through and identify some continuous improvement opportunities and log the ideas in iSpace. We just need to log the ideas now and can take up implementation later. Not everything can be implemented, and that is fine. But we would like to have the ideas logged anyway.

Would you please talk to the folks reporting to you and pass this on and encourage them to contribute to BlueBolt actively during the available time.

Regards,
Anish
